PROFESSIONAL SUMMARY

Keen to learn and result-oriented aspiring software developer. With 1.5+ years of experience and skillset including **Flutter**, and **UI/UX** principles. Self-motivated and intrigued by technology, with an interest in building products that reach a mass user base. Wishing to contribute to the organization's goal while also aiding his own personal growth.

EDUCATION

B.Tech. (CSE)

Amity University, Noida

August 2015 - October 2019

EXPERIENCE

Flutter Developer

CardByte, Gurugram

JUNE 2022 - PRESENT

- Worked on CardByte's B2C and B2B applications.
- Developed hybrid mobile applications using Flutter SDK and Bloc state management.
- Worked on the widget and unit testing of the code; maintaining 85% code coverage.

Achievements:

- I refactored the legacy code of the B2C application, increasing the count of crash-free users significantly i.e. from 50-60% to 95% (Firebase Crashlytics).
- Created a home screen widget using native stack i.e. Kotlin in Android and SwiftUI in Apple.
- Integrated Firebase projects over multiple environments.
- Migrated from SQLite local database to NoSQL database (Isar).
- Created the environment-switching script using Python CLI.

PROJECTS

CardByte B2C

Tech Stack: Dart, Flutter, Bloc, Clean Architecture, In-App-Purchase, Firebase,

CardByte contact scanner on your device, you can store, print, scan, & and exchange e-visiting cards digitally in seconds.
